COLLEGES OF NURSING TRUST CORE

Used by hundreds of health science programs across the country, CORE provides software tools designed to support the entire student journey. The solutions within the CORE Technology Suite simplify complex processes within the areas of clinical education, student assessment, career readiness, and continuing education.

We've researched and tried many other solutions and we've been pleased with CORE."

"Overall CORE is a great system. I appreciate how open the CORE team is to hearing what we need and making changes to the system. **The Client Success team is quick to respond to questions**. I enjoy how they create videos to help walk us through anything we are struggling with. As someone who oversees multiple programs across the university, CORE has allowed us to have one consistent system across all nursing programs that works for everyone. **CORE has helped to streamline and make our processes so much more efficient**. We're able to more easily communicate and we're taking a lot of the duplication out of our day to day processes.

PURDUE
UNIVERSITY®
GLOBAL

Dr. Tricia Berry, PhD
Associate Dean of Clinical and Practicum Programs
Purdue University Global School of Nursing

"**We've researched and tried many other solutions and overall we've been pleased with CORE**. The functionality is outstanding and we've also had significant cost and time savings for our program in comparison to what we've used in the past. Beyond that, **the CORE team was incredibly helpful and supportive** when COVID hit and we were forced into a big period of uncertainty. CORE helped us to track the virtual options we would offer to our students so we could have accountability and continue to meet our accreditation standards.

COLLEGES OF NURSING TRUST CORE

"I always feel as though the success of our program is CORE's top priority."

"Our clinical placement process has greatly improved with CORE's SmartMatch tool. It used to be challenging to do it objectively and fairly while also trying to take student preferences into account. **With CORE, students are really happy** to have some say in their placements while we as administrators are still able to maintain fairness and objectivity."

Since utilizing CORE, managing our varying **clinical site requirements has also become easier**, more streamlined, and more organized for us.

Another huge plus we've been experiencing with CORE is that **they provide one-on-one customer support**. Even if there's something in the system we're unable to figure out, we have someone at CORE we can contact to get our questions resolved quickly. There have been instances where I have an answer in as little as 20 minutes.

UCONN

Amanda Moreau, MSN, RN
Coordinator of Clinical Placements,
Clinical Instructor
UConn School of Nursing

"The whole CORE team – sales, implementation, development, and client success – is personally invested in the success of our programs. **They have been invaluable in providing hands-on, personalized support**. They made the implementation process as easy and detailed as possible so that we were fully prepared to roll out the system to our administrators, students, and instructors. A survey we conducted with our Nursing program even showed that **student satisfaction has increased in the time that we've had CORE**.

Their team is truly committed to a strong partnership and **continues to exceed our customer service expectations**. The CORE team has set themselves above all the other software providers at our institution.
